**Quarterly Activity and Data Report
Quarter 4, 2022**

Background

The Racial and Identity Profiling Act of 2015 (AB953) took effect on January 1, 2016, and requires California law enforcement agencies to collect and report data to the Office of the California Attorney General. The requirements of Assembly Bill 953 include reporting from California cities and police departments on any complaints alleging racial or identity profiling and detailed demographic data for traffic and pedestrian stops.

In 2016, the City and County of San Francisco also passed local legislation to support the police reform efforts of the San Francisco Police Department. The Board of Supervisors voted unanimously on an ordinance that established Administrative Code Sec. 96A (Law Enforcement Reporting Requirements) and specified reporting requirements for the San Francisco Police Department (SFPD). The Quarterly Activity and Data Report (QADR) (previously named the “96A report,” short for the Administrative Code Sec. 96A: Law Enforcement Reporting Requirements) serves to meet the quarterly reporting requirements and includes data pertaining to stops, searches, arrests, use of force and alleged bias-related complaints. In Quarter Three of 2020, the Department started conducting occasional in- depth analysis with rotating scope and topic. The QADR provided references and discussions of academic research on the topic of disparities in policing.

In 2021, SFPD outlined its method and approaches to applying academic research in the field of disparities in policing. The primary mechanisms for these efforts center on policy changes to many Department General Orders, the operational policy of the Department, and the training curriculum for officers. Policy revisions are ongoing and improved continuously and in partnership with the Police Commission, Department of Police Accountability, and community members, and other best practices.

The data presented in this report are analyzed over time and can be used to analyze the progress of current police reforms undertaken by the San Francisco Police Department. The data analysis is utilized to critically inform and improve policies, training, and tactics in policing, including any disproportionate contact and inequities in policing. This report serves to demonstrate that SFPD is:

- committed to delivering on the values encapsulated by “Safety with Respect,” the Strategic Framework developed from recommendations of the Collaborative Reform Initiative,
- actively seeking and implementing ways to improve transparency and accountability to San Franciscans,

- 
- conducting data reporting recommended by President Obama’s Task Force on 21st Century Policing. and
 - meeting the requirements of the San Francisco Administrative Code Sections 96A (Law Enforcement Reporting Requirements), and 96A.5 (Victim Demographic Reporting) and 96D (Domestic Violence Reporting).
 - Strives to continue ending any inequities, including racism and bias, in modern policing.

The data included in this report generally covers the time period: October 1, 2022 – December 31, 2022. Due to collection standard changes in our Use of Force system that went into effect on December 8, 2022, Use of Force data is provided up to that date for comparison to like data from previous reports. Use of Force data from 9 December 2022 forward will roll into the Q1 2023 QADR report, for comparison with like data. When comparisons of Q4, 2022 Use of Force data against historical Use of Force data are made, the truncated dates are utilized for a direct comparison.

Collaborative Reform Update

Collaborative Reform Initiative Status

The SFPD received its Phase III Collaborative Reform Initiative (CRI) report, which notes that SFPD has reached substantial compliance on 245 of 272 recommendations originally issued by the Federal Department of Justice . The report was prepared by Jensen Hughes, LLC, and validated by the California Department of Justice, in February 2022.

As of April 6, the 5 focus areas of CRI held the following status:

Focus Area	Status	Total
1 - Use of Force	In Progress	7
	Substantial Compliance	51
2 - Bias	In Progress	7
	Substantial Compliance	47
3 - Community Policing	In Progress	6
	Substantial Compliance	54
4 - Accountability	In Progress	7
	Substantial Compliance	61
5 - Recruitment, Hiring, and Personnel Practices	In Progress	0
	Substantial Compliance	32
Sub Total	In Progress	27
Sub Total	Substantial Compliance	245
Grand Total		272

SFPD’s website provides documentation for all substantially compliant recommendations, including SFPD’s submission summary, and narrative summaries detailing compliance as determined by the independent evaluator and validated by the California Department of Justice. The website also includes an interactive dashboard providing specifics for all recommendations, including the wording and statuses of each.¹

Remaining CRI Recommendations

Understanding the need for a continued fair and impartial evaluation of the Department’s progress, the City has renewed, through April 2024, a Memorandum of Understanding with the California Department of Justice. SFPD intends to extend the independent consultants’ external review contract to continue to bring their professional expertise and knowledge of best practices in other agencies.²

There are 27 remaining recommendations which will complete the original 272. As noted in the Phase III report, SFPD is actively working on these projects and will continue to report progress to the Police Commission. For transparency, the progress on reforms and the in-progress recommendations is published on the SFPD website.

SFPD is proceeding with work that will complete these remaining recommendations, most of which require technology procurement, design, deployment, and configuration, as well as planning for and hiring permanent analytical staff and other personnel to support the ongoing improvements necessary to sustain and drive reform. There are five projects that encompass the content necessary to complete 23 of 27 of the remaining recommendations and four standalone recommendations, all of which are represented in the diagram below.

Standalone Recommendations	DOJ Rec#	Description
	1.1	Studying what factors give rise to use of deadly force.
	55.2	IA reporting aggregate discipline data regularly.
	39.1	Community Policing Strategic Plan
	41.1	Community Policing Manual

CRI Sustainability

To make collaborative reform a long term, permanent driver of continued improvement in the SFPD, it is necessary not only to complete a recommendation once, but also to re-engage that recommendation routinely to ensure its continued compliance. This process is referred to as ‘CRI Sustainability.’

Sustainability Requirements

Types of Review:

- Annual
- Quarterly
- Rolling (Bi-Annual)
- Single Document or Practice

Total Recommendations Requiring Sustainability Efforts:

187

	Use of Force	Bias	Community Policing	Accountability	Recruitment and Retention
Annual	9	12	29	15	8
Quarterly	16	20	16	20	16
Rolling (Bi-Annual)	11	1	15	13	7
Single Document or Practice	5	5	7	0	0
Total Recs for Topic*	37	34	47	42	27

*Some recommendations require multiple types of updates in a single recommendation.

SFPD identified 187 of the 245 completed recommendations that require a sustainability effort. These efforts are included among the compliance measures provided for each recommendation and include requirements such as ongoing policy review/update, data or document audits, or staff training. The expectation is that the reviews, reports, and analyses will provide opportunities to reflect, evaluate, and improve upon the processes established and documented for CRI. Further, these sustainability efforts may be an annual, bi-annual, quarterly, or a one-time requirement.

An example of sustainability that represents continuous improvement mechanisms is the most recent update of the Department General Order related to Use of Force. In 2016, after the commencement of the implementation phase of the Collaborative Reform partnership, the President of the San Francisco Police Commission and

representatives from the Police Department and the Department of Police Accountability worked together to update this policy. In 2020, after an audit performed by the San Francisco Controller’s Office, a report from the Center for Policing Equity, and ongoing reviews of community complaints and national concern regarding law enforcement’s use of pressure to the head and neck, SFPD proposed an update to this policy. A new policy was adopted by the Commission in January and, after an implementation period, went into effect on April 12, 2022.

An example of a repeated process and reporting effort, CRI recommendation 40.1 required the generation of a Community Policing Strategic Plan. The Community Policing Strategic Plan was developed by an SFPD-led working group of community members and representatives and SFPD personnel. It was developed during 2017 and 2018, with publication in late 2018. The Community Policing Strategic Plan further required unit and station plans be developed and published annually, the first of which have been completed [and can be viewed online](#)³.

As previously noted, SFPD has identified 187 recommendations with regularly required reporting or reviews and has conducted the first year of validation that the ongoing work is being completed. The remaining 58 recommendations were implemented as a one-time activity to reach substantial compliance. Also, SFPD will review to ensure that circumstances are still in place that established the one-time recommendations. These reviews are critical to the success of sustained and ongoing change and continued improvement in SFPD.

Use of Force Data Methodology Update

Policy Changes Drive Changes to Data Collection

On January 12, 2022, the San Francisco Police Commission passed a revised policy for the use of force, called "[Use of Force & Proper Control of a Person](#)." 90 days later, on April 12, 2022, the SFPD transitioned to this new use of force standard.

The April 2022 use of force policy changed multiple definitions within the policy, in most cases broadening definition and reducing thresholds for reportable uses of force. The 2022 policy also added new categories of force, and associated definitions for collection.

On November 2, 2022 the San Francisco Police Commission passed additional revisions to the policy, in most cases narrowing definitions and increasing thresholds for reportable uses of force. This revised general order went into effect on December 8th, 2022.

For the purposes of reporting, the Use of Force data and Calls for Service data in this Q4 2022 report account for 1 October 2022 thru 8 December 2022 to provide a comparable set of statistics under a single policy standard (the April 2022 Use of Force standard.) 9 December thru 31 December 2022 Use of Force statistics will roll into the Q1, 2023 report, where it can be compared to a like set of Use of Force Statistics under the revised December, 2022 Use of Force standard.

What Policy Changes Were Made?

Physical Control Threshold

Most significantly, the April 2022 policy reduces the reporting threshold for uses of force by removing the requirement that there be a complaint of pain present for a physical control hold to be reportable. Previously, the 2016 policy noted (emphasis added):

*Any use of force which is required to overcome subject resistance to gain compliance that results in death, injury, **complaint of injury in the presence of an officer, or complaint of pain that persists beyond the use of a physical control hold.***

Specifically, the April 2022 policy notes (emphasis added):

*“Officers shall report any use of force involving physical controls that are used **in any attempt to overcome any resistance, regardless of injury or complaint of pain.** Use of control holds to effect handcuffing, where the person does not offer physical resistance, is not injured, and does not complain of pain, are not included.”*

Firearm Pointing

The April 2022 policy include instances in which firearm pointing use of force type to include having a firearm pointed at the low ready towards a person.

Under the 2016 policy:

REPORTING. When an officer intentionally points any firearm at a person, it shall be considered a reportable use of force.

Under the April 2022 policy:

...the pointing of a firearm (including low ready) at or in the direction of a person is a reportable use of force.

Drawing and Exhibiting a Firearm

The April 2022 policy also introduces a new category of data collected around the drawing or exhibiting (but not pointing) of a firearm. The policy specifically states that:

DRAWING AND EXHIBITING A FIREARM. The mere drawing and exhibiting of a firearm is not a reportable use of force. However, the pointing of a firearm (including low ready) at or in the direction of a person is a reportable use of force.

The drawing and exhibiting of a firearm by itself is not considered a use of force⁴ in the April 2022 policy. However, SFPD is collecting these data. While not included in this report,, as SFPD explores this rich new dataset further, additional analysis may provide further insight into trends and patterns to inform further policy and training discussions. Where these analyses develop findings or patterns, they will be provided in this report.

Technical Notes

The transition to the April 2022 policy also allowed the department to transition to an electronic entry system, as opposed to forms that were filled out and sent to a central point for entry. Adoption of this system is part of continual improvement that builds on

⁴ 5.01.08.C.7 “DRAWING AND EXHIBITING A FIREARM - The mere drawing and exhibiting of a firearm is not a reportable use of force.”

DOJ Recommendation 4.1, issued in 2016, which notes “...the department needs to create an electronic use of force reporting system so that data can be captured in real time.”

The use of force data system is an extension of our crime data warehouse, which is much of the department’s incident report system of record. The Airport Bureau uses a different incident report system that is compatible with the San Mateo County systems of record.

Dataset Handling and Adjustments

As the department produced the QADR for Q4, 2022 with a new UoF dataset, with new structure, and all new users, certain instances of the data required deletion, alteration, or transformation in order to be restructured for accurate analysis. Where technical corrections to the data collection system were necessary, they were provided to the SFPD Technology applications team for remediation. As such, the following adjustments to the data were necessary.

Field(s)	Application or Caveat
CAD Number, Incident Report Number, Time, Time Span, UoF Subject, Uof Type	Fields unpopulated: Records entered with no incident report number, CAD number, time, timespan, UoF Subject, or UoF type are not counted, as they were entered in error and intended for deletion. A delete functionality has not been built into the system as of publication. 200 lines of data are excluded. None of the 200 are listed with an associated use of force.
Reason for Drawing/Exhibiting firearm description	Double counting correction: Records with multiple “Officer Reason for Drawing Firearm Description” lead to duplicated uses of force in situations where both a drawn/exhibited entry AND a UoF entry are generated by a single officer on a single subject. Only one of each type of UoF per reason for drawing firearm, per officer, per subject is counted.
Type of Force Used: Other	No detail in “Other” Type of Force: This category formerly had a field of descriptive text to clarify what the nature of the UOF was. As of publication, the system does not provide a description for the “Other” UOF types. Upon manual review, this field is now being used to also indicate instances where there are multiples of the same type of force applied, by the same officer against same subject during a single incident.

	Such additional UOF was not collected in the past system. Additionally, manual review of incidents notes some entries may also include overreporting, to include counting of 'handcuffing', 'assisting upright to a seated position' and others.
Airport Data	Due to the Airport Bureau using the San Mateo County incident reporting system, the Airport Bureau Supervisory Use of Force Evaluation forms still utilize a manual entry system. As of publication, data from the Airport has not been integrated into the rest of the Department's use of force data. As such, Airport Bureau data is not available for publication in this report. Upon data integration, Airport data from Q2 2022 onward will be published.

Qualitative Notes

With the implementation of the 2022 policy, Department members requested clarification of some aspects of the policy. These include the exact threshold for the use of a control hold, interpretation of the seating of an individual, and how to capture multiple similar uses of force in the same incident in the current use of force data application. Due to the broad changes in the use of force standard, data captured under the 2022 policy may have been overreported as officers adjusted to the new reporting standards.

UoF Thresholds and Responsible Analysis

When analyzing a dataset with known data collection methodology changes, steps must be taken to continue to provide trend and pattern information both before and after the change. For example, to compare use of force data between 2016 and mid-2022, it is necessary to remove those uses of force that were deemed as uses of force in 2022, but not in 2016. To do this, we apply the standards in the 2016 policy as a filter against the data collected under the April 2022 policy. This allows SFPD to understand when officer behavior has changed, as opposed to more types of behavior (that were also previously in use) being captured. This report also provides the data captured using the standard established in 2022.

Specifically, we apply the following logic:

Field	Application
Physical Control	Records where there was No or Unknown for Complaint of Pain by subject were not included, as in the past Physical Control records were only captured if there was Yes for Complaint of Pain
Firearm Low Ready	Records with Firearm Low Ready as type of force were not included as this type of force is not in the 2016 policy.
Firearm Drawn & Exhibited	Records that have any value listed in the “Officer Reason for Drawing Firearm Description” field, AND have no additional use of force recorded were not included, as this field indicates that these are records being captured by a new form that did not exist in the past UOF reports.
See above	The dataset caveats noted above regarding duplicates, blanks and other categories apply as filters to this analysis as well.

Analyzing (and reporting on) both standards’ outcomes provide not only more robust use of force information from the increased reporting resulting from the April 2022 policy, but also provides a comparison of similar officer interactions across non-comparable data sets.

Despite best efforts, data utilizing the above filters does not appear to capture fully a like-for-like comparison of 2022 data against 2016 data. This may be due to a level of increased reporting (or over-reporting) of uses of force by members even after accounting for the above filters. To address this, SFPD has further improved training, materials, and worked with the Police Commission to adjust the language in the policy to improve clarity.

Future Analysis

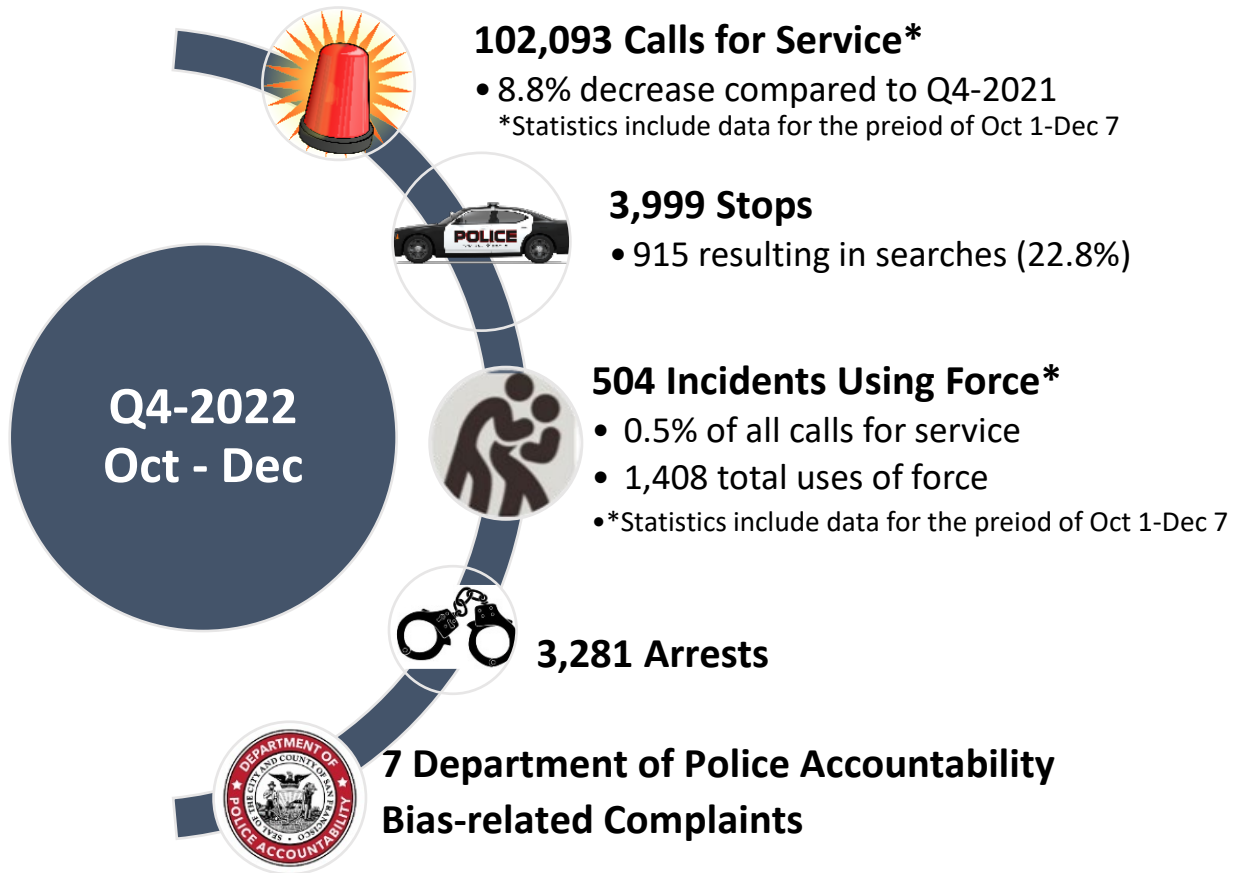

To better understand the numerical increases in reported uses of force, future analysis may include attempting to understand if the numerical increase in uses of force an increase is entirely based on new and broader reporting requirements, a real increase in uses of force in the field, a combination of both, or something else altogether.

**SFPD stands for safety with respect for all.
We will:**

- Engage in just, transparent, unbiased, and responsive policing
- Do so in the spirit of dignity and in collaboration with the community
- Maintain and build trust and respect as the guardian of constitutional and human rights

Q4 Overview

Data collected during the pandemic and recovery period reflect the unique circumstances of the time. Users should take care when comparing data trends across pandemic response and non-response timeframes.

Suspects

SUSPECTS OBSERVED AND REPORTED

The suspect information provided includes descriptions that are generated by members of the public or observed by Department members and documented in police incident reports.

DESCRIPTION	Oct	Nov	Dec	Q4 2022	% of Total Suspects Q4 2022
Asian/ Pacific Islander	98	81	103	282	3.7%
Black/ African American	1103	965	895	2963	38.4%
Hispanic/ Latino	479	407	368	1254	16.3%
Native American	5	10	3	18	0.2%
White	545	458	525	1528	19.8%
Others	548	557	561	1666	21.6%
Total	2,778	2,478	2,455	7,711	100.00%

Total suspects observed and reported in Q4 2022 (7,771) decreased by 6% from Q4 2021 (8,220). Black/ African Americans accounted for 38% of all suspects observed and reported in Q4-2022.

Note: Subject data is extracted from incident reports via the Person Schema of Crime Data Warehouse via Business Intelligence tools. Search criteria includes results in which Person Type = "Suspect." Records with Unknown Race/Ethnicity data are not included.

Stops and Searches

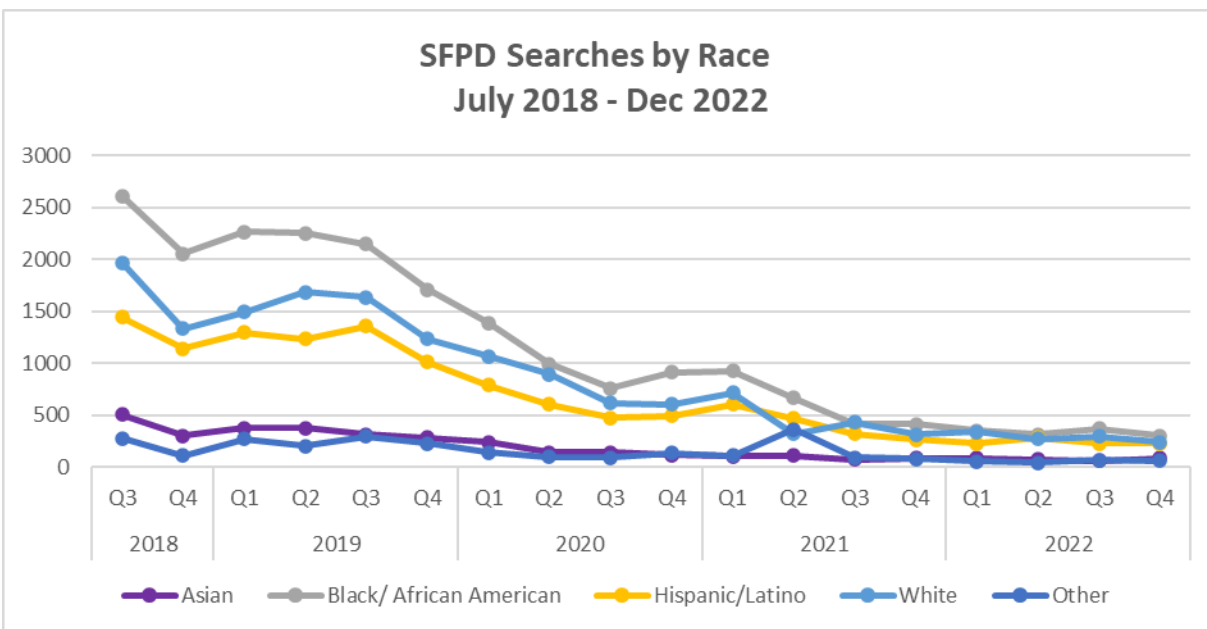

STOPS AND SEARCHES

In Q4- 2022, 3,999 stops were conducted, an 18% decrease as compared to Q4 -2021. Of those stops, 915 resulted in searches (22.8%). White individuals accounted for 29% of all stops and 26% of all searches. Black individuals accounted for 21% of stops and 33% of searches.

Compared to Q4-2021, the percentage of total stops decreased by 5% for White individuals and decreased by 4% for Black individuals.

Stops and Searches

The percentage of stops resulting in searches have declined slightly in Q4 2022 for Black, White and Other, and increased by 3% for Hispanic/Latino individuals and 2% for Asian individuals.

	STOPS			SEARCHES		
Perceived Race / Ethnicity	Q4-2021 (n=4,884)	Q4-2022 (n=3,999)	%Δ from Q1-2021	Q4-2021 (n=1,152)	Q4-2022 (n=915)	%Δ from Q1-2021
Asian	12%	15%	2.8%	8%	9%	2%
Black/ African American	25%	21%	-4.4%	34%	33%	0%
Hispanic/ Latino	19%	23%	3.8%	22%	25%	3%
White	35%	29%	-5.6%	32%	26%	-6%
Other	9%	12%	3.3%	5%	7%	2%

Note: “Perceived” identifiers are used to categorize demographic information specific to Stop Data Collection System

Stops and Searches

SEARCHES BY LEVEL OF DISCRETION

The Department classifies the various types of searches into three categories:

1. Discretionary⁵ searches,
2. Administrative searches, and
3. Other searches.

Discretionary searches require an officer to ask and receive consent to search. In such cases, officers have the most flexibility in determining who to search and include only those occurrences where consent is the only basis provided. Administrative searches include those that occur because of a search warrant, arrest, or vehicle inventory. Other searches have a variable range of discretion and include reasons such as officer safety, suspected weapons, visible contraband, evidence of crime, etc.

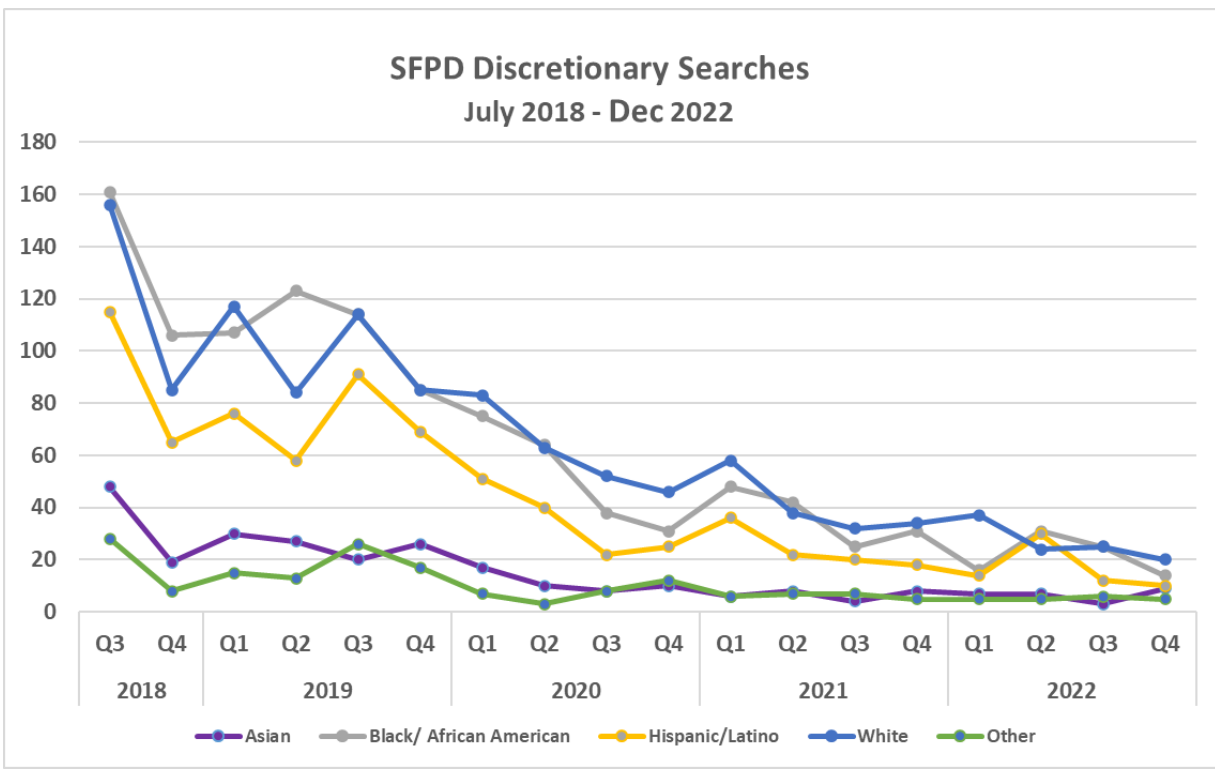

Discretionary Searches	Administrative Searches	Other Searches
*Consent Given	*Incident to Arrest	*Officer Safety/ Safety of Others
	*Search Warrant	*Suspected Weapons
	*Vehicle Inventory	*Visible Contraband
		*Odor of Contraband
		*Canine Detection
		*Evidence of Crime
		*Emergency
		*Suspected Violation of School Policy
		*Condition of Parole/ Probation/ PRCS/ Mandatory Supervision

⁵ In Q3, 2021, the SFPD has renamed search categories from 'Consent Only' and 'Supervision Searches' to 'Discretionary' and 'Administrative' searches to align with terminology being used by the California Department of Justice and the Race and Identity Profiling Act Board.

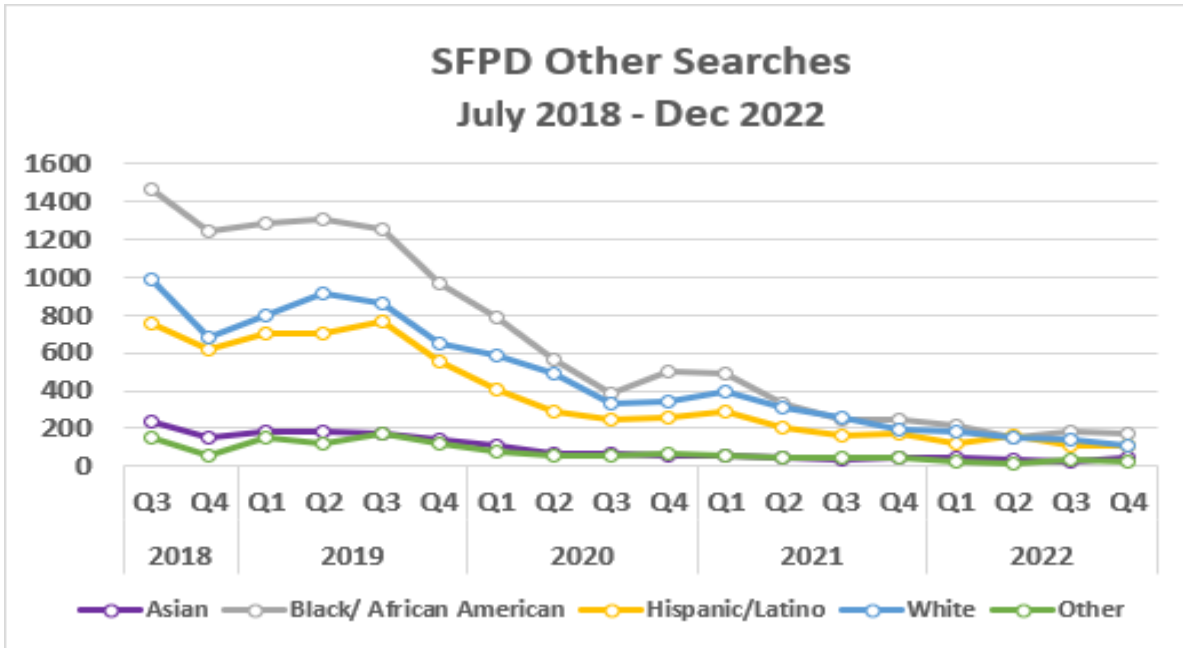

Stops and Searches

The 915 total searches conducted in Q4-2022 were categorized below. Many of these incidents have more than one cause for search and are included in multiple categories.

- Discretionary Searches: 58 (4.8%)
- Administrative Searches: 661 (55.6%)
- Other Searches: 468 (39.4%)

Discretionary searches have decreased by 40% overall since Q4-2021

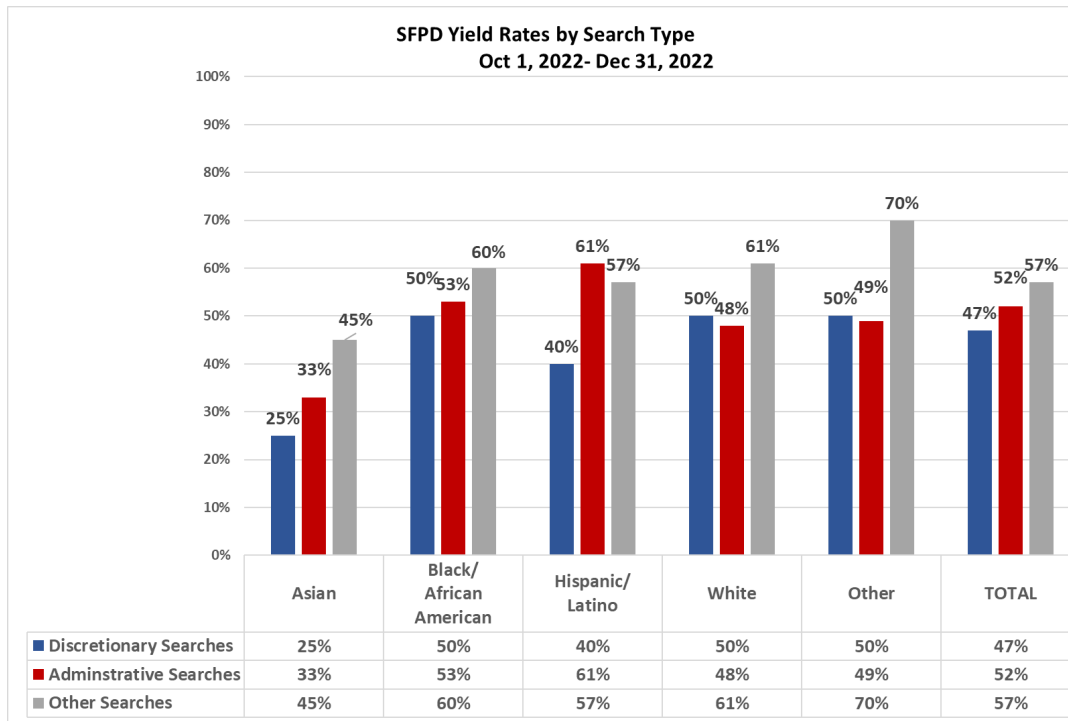

Other searches have decreased across all race/ethnicities by 33% overall since Q4-2021, from 696 to 228 total searches.

Stops and Searches

SEARCH YIELD RATES

The average yield rate for all searches was 52% in Q4-2022. The yield rate was 47% for consent only searches, 52% for supervision searches, and 57% for other searches.

As noted in the Phase III SFPD Collaborative Reform Initiative report:

“The assumption among researchers is that if the rate of discovering contraband during searches of a particular identity group is low, then those people are “objectively less suspicious and may be searched, at least in part, because of their perceived identity.” [HTTPS://OAG.CA.GOV/SITES/ALL/FILES/AGWEB/PDFS/RIPA/RIPA-BOARD-REPORT-2021.PDF](https://oag.ca.gov/sites/all/files/agweb/pdfs/ripa/ripa-board-report-2021.pdf) AT PAGE 48.

In turn, if the hit/yield rate for a particular identity group increases, that means that officers are using more objective factors – and not a person’s perceived identity – to make the decision to search a person. In short, higher hit/yield rates suggest that officers are less likely making a biased decision to search, but are rather using objective factors to inform their decision-making.⁶”

⁶ SFPD Collaborative Reform Initiative Phase III – Final Assessment Report, Hillard Heintze, 2022, p 6, footnote 11.

Use of Force

USE OF FORCE

During Q4⁷-2022, the Department responded to 102,093 total calls for service. Department officers were assaulted 49 times and force was used in 504 incidents which represented 0.5% of all calls for service. Of those 504 incidents, force was used 1,408 times by 615 officers against 579 individuals. In Q4 2022, **there were no Officer Involved Shooting incidents resulting in death.**

⁷ UoF and CFS data in this section are from 1 October, 2022 thru 8 December, 2022. See data exploration for explanation.

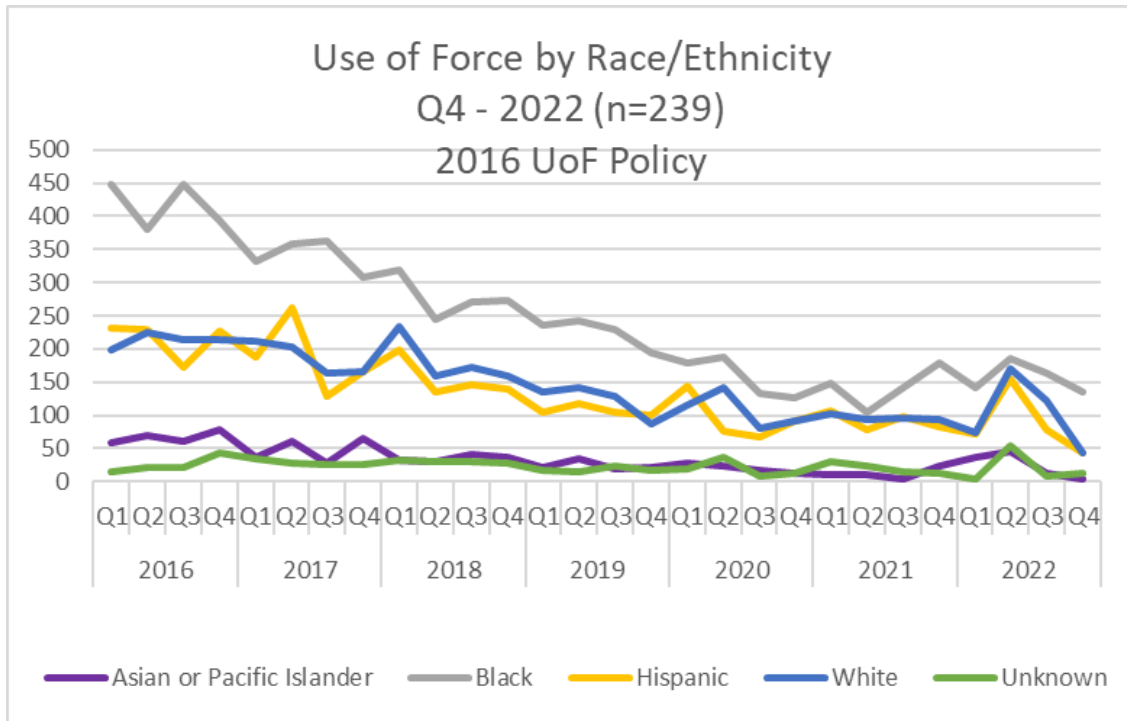

Changes to the Use of Force Department General Order and associated data collection is discussed in the data exploration section of this report and should be kept in mind when interpreting these data.

Where possible this report provides data under both the 2016 and April 2022 Use of Force policy to allow for historical context and tracking of trends over time.

Where possible this report provides data under both the 2016 and April 2022 Use of Force policy to allow for historical context and tracking of trends over time.

Use of Force

White individuals were the individuals of 18% of the total uses of force, 57% against Black/African American, and 18% against Hispanic/Latino. The proportion of uses of force against all demographic groups has remained relatively constant, with some variability in the last few quarters. For example, from Q4 2021 to Q4 of 2022, uses of force against Asian individuals decreased by 4.6%, to account for 1.7% of all uses of force in Q4, 2022 with uses of force against Black/African American individuals increasing by 12% as compared to the same quarter last year, increasing to 56.9% of all uses of force in Q4-2022. Uses of force against Hispanic/Latino individuals decreased by 5.9% and increased by 14.4% against White individuals.

Race/Ethnicity	Uses of Force Q4-2021 (n=272)	Uses of Force Q4-2022 (n=239)	%Δ from 2021
Asian	6.3%	1.7%	-4.6%
Black/African American	44.9%	56.9%	12.1%
Hispanic/Latino	23.9%	18.0%	-5.9%
White	4.0%	18.4%	14.4%
Other	4.0%	5.0%	1.0%

Use of Force

TYPES OF FORCE USED

Under the 2016 Use of Force policy, Physical Control, Firearm Pointing and strike by object were the top three types of force used and accounted for 92% of total Uses of Force in Q4 2022.

	Previous 2016 Reporting Standard - Q4 2021	Previous 2016 Reporting Standard - Q4 2022	% Change
Chemical Agent	9	6	-33.3%
ERIW	21	3	-85.7%
Firearm Pointing	110	12	-89.1%
Impact Weapon	5	1	-80.0%
Other	6	5	-16.7%
Physical Control Hold/Take Down	98	199	103.1%
Spike Strips	6	0	-100.0%
Strike by Obj. (personal body weapon)/Fist	17	9	-47.1%
Vehicle Intervention	0	4	not calc
Grand Total	272	239	-12.1%

	New Apr-Dec 2022 Reporting Standard - Q4 2022
Chemical Agent	10

Physical Control Hold/Take Down	950
Strike by Obj. (personal body weapon)/Fist	33
Vehicle Intervention	33
Grand Total	1408

Under the April-December 2022 Use of Force policy, Physical Control, Firearm Low Ready, and Firearm Pointing were the top three types of force used and accounted for 93.4% of total Uses of Force in Q4 2022.

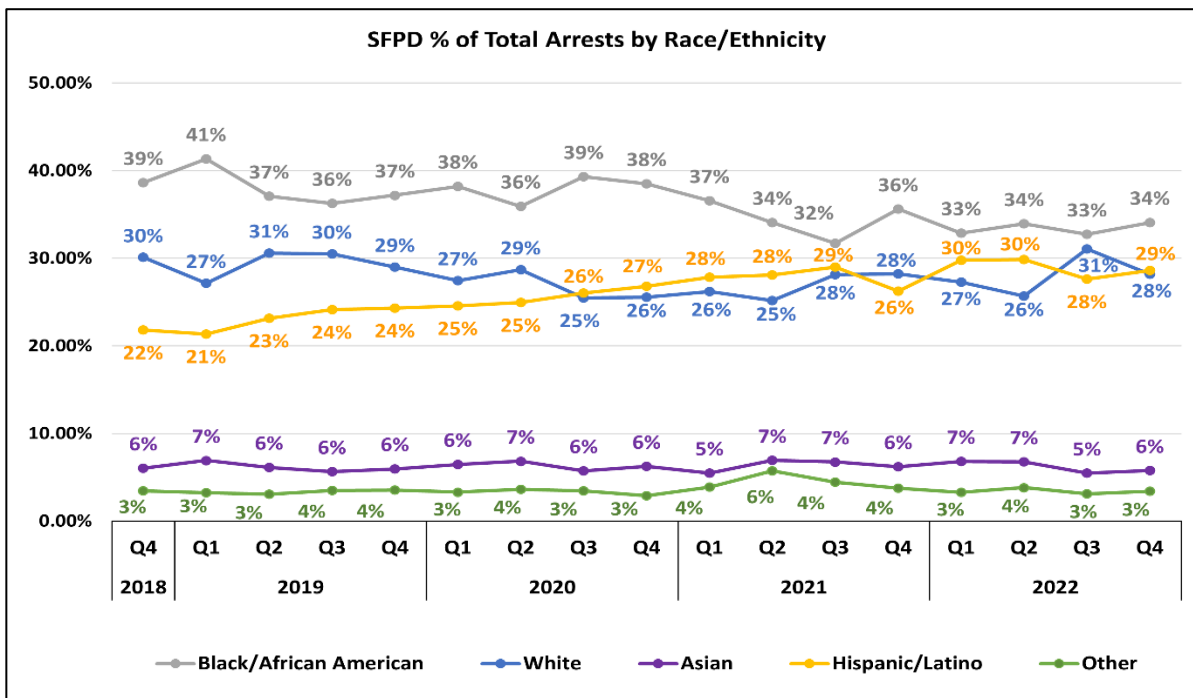

USE OF FORCE RESULTING IN DEATH

There were no Use of Force incidents that resulted in death during Q4-2022.

Arrests

ARRESTS

There were 3,281 arrests during the Q4-2022, a 12% increase from Q4-2021 (2,936). Black/African American individuals accounted for 34% of all arrests, while Hispanic individuals accounted for 29%.

Percentage of Total Arrests			
Race/ Ethnicity	Q4-2021 (n=3,001)	Q4-2022 (n=3,281)	%Δ from 2021
Asian	6%	6%	0%
Black/ African American	36%	34%	-2%
Hispanic/Latino	26%	29%	3%
White	28%	28%	0%
Unknown	4%	3%	-1%

Overall arrests of Hispanic subjects increased by approximately 3% in Q4 2022 compared to Q4 2021.

*Detailed data regarding age groups and gender can be found later in this report.

Arrests

ARRESTS BY DISTRICT

It is important to note that arrests made by Department members at San Francisco International Airport are investigated by and reported as part of San Mateo County data and are not included in the City's totals.

The "Outside SF/Other" category includes arrests made by Department members outside the jurisdiction of the City and County of San Francisco by the SFPD and arrests inside the City and County of San Francisco by agencies other than the SFPD that are captured by our Incident Reporting system.

Overall arrests made by Department members within the City and County of San Francisco jurisdiction increased in Q4-2022 compared to Q4-2021 by 9%.

District	Q4 2021	Q4 2022	% change
Co. A - Central	473	414	-12%
Co. B - Southern	406	493	21%
Co. C - Bayview	281	269	-4%
Co. D - Mission	425	417	-2%
Co. E - Northern	265	320	21%
Co. F - Park	94	72	-23%
Co. G - Richmond	91	127	40%
Co. H - Ingleside	173	260	50%
Co. I - Taraval	165	131	-21%
Co. J - Tenderloin	561	711	27%
Outside SF	67	67	0%
Total	3,001	3,281	9%

Bias-Related Complaints

DEPARTMENT OF POLICE ACCOUNTABILITY

The Department is required to obtain information from the Department of Police Accountability (DPA) regarding the total number of complaints received during the reporting period that it characterizes as allegations of bias based on race or ethnicity, gender, or gender identity. The Department also is required to include in its report the total number of complaints DPA closed during the reporting period that were characterized as allegations of bias based on race or ethnicity, gender, or gender identity, as well as the total number of each type of disposition for such complaints.

Cases Received in Q4-2022

Type of Case Received	# of Cases
Racial Bias	2
Gender Bias	0
Transphobic Bias	0
Both Racial and Gender Bias	0
TOTAL	2

DPA received 175 total cases for the quarter.

2 Officers were named for allegations of racial or gender bias.

Total Cases received in 2022 involving Racial or Gender Bias: 8 Cases

During Q4-2022, DPA completed 7 complaint investigation cases in which there was an allegation of racial/ethnic bias. There were no sustained findings indicating bias. There were no sustained allegations of racial or gender bias in Q4-2022.

Q4-2022 Case Closures & Dispositions

Type of Case	Sustained	Withdrawn	Unfounded	No Finding	Insufficient Evidence	Proper Conduct	Referral	TOTAL
Racial Bias	0	0	2	1	2	0	0	5

DPA closed a total of 173 cases for the quarter, including above.

DPA closed a total of 759 cases for the year, including above

Bias-Related Complaints

BIAS-RELATED COMPLAINTS RECEIVED BY SFPD, AND INVESTIGATED BY THE DEPARTMENT OF HUMAN RESOURCES

As part of the Department’s commitment to transparency, the Department also reports on all bias-related complaints received internally from members of the Department and forwarded to the Department of Human Resources (DHR) for investigation. Closed cases may include complaints received in previous quarters. Bias-related complaints are referred to as Employment Equal Opportunity (EEO) cases by DHR.

Population Benchmark Analysis, Per Capita Race/Ethnicity

The San Francisco Police Department received requests from various key community stakeholders to present a per capita population benchmark analysis. This analysis captures a particular race or ethnicity, as compared to their representation in a similar population of 1000 individuals. We adjust for population in our analysis by the race/ethnic demographic groups in our data. This analysis is compared within this report's quarter and all quarters with data available. A disparity analysis- the contrast between different race/ethnicity groups against each other- is also considered to generate a numerical comparison. This analysis may surface potential racial disparities when comparing policing activities with the various demographic groups. In all cases, a population benchmark analysis that presents per capita results will have challenges, as noted below.

What is a benchmark?

A benchmark is a common frame of reference, created by comparing at least two sets of data to each other, to consider trends and context presented in the data. In this analysis, we compare citywide population demographics against pre and post stop activities by SFPD, and then convert those contact ratios into a Per Capita (or by 1000) number.

Population Benchmark Weaknesses

As noted by the California Department of Justice in their RIPA 2021 report, "An assumption of this type of comparison is that the distribution of who is stopped would be similar to who resides within a comparable geographic region. However, this is not always the case, as people may travel a considerable distance from where they live for several reasons (e.g., to go to work, visit family).⁸" The supposition that the comparison of police data should reflect the residential population makeup makes several assumptions that are not addressed in this analysis, and may result in inaccurate results of the comparative disparities noted in the analysis.

Comparing against residential population does not account for individuals who travel outside their home residential district or zip code in the residential population count, potentially causing over or under representation in the data⁹.

⁸ [2021 RIPA Board Report - Racial and Identity Profiling Advisory \(RIPA\) Board \(ca.gov\)](#) Pp46

⁹ <https://oag.ca.gov/sites/all/files/agweb/pdfs/ripa/ripa-board-report-2020.pdf> pp26-27

Q4 Quantitative Analysis

Per Capita Population Benchmark

It should be noted that SFPD categorizes residential population demographics differently than other agencies. For instance, the Census American Community Survey (ACS) and Racial and Identity Profiling Act (RIPA) have different data standards. When the RIPA board data is used, it is perceived demographic data being compared to self-reported demographics in the residential population data.

Further, “Population counts generally overestimate bias in stop decisions, as differences in poverty, education, and labor market opportunities vary across identity groups in the U.S. Because education and employment affect criminal behavior, disparities along these dimensions will lead to disparities in who commits crime. In this way, pre-existing social disparities will tend to make the fraction of Black or Latinx people in the population smaller than the fraction of Black or Latinx people who are potentially subject to being stopped, overestimating any bias in a stop decision.”¹⁰

Despite these known limitations in working with population data within a benchmark, it does not mean analysis using a population benchmark is invalid. These limitations should, however, be kept in mind when interpreting results of any population benchmark. Results of population benchmarks can inform future analysis’ and provide insight into potential disparities, trends, and differences between geographic areas, such as SFPD districts.

Population Benchmark Strengths

A key benefit in using a population data benchmark is the intuitive ease of understanding as compared to other benchmarks. Other benchmarking techniques can utilize univariate or multivariate statistical analysis that can be hard to explain succinctly and can quickly become overwhelming.

What did SFPD do?

SFPD took a citywide demographic dataset from the 2019 American Community Survey (ACS), administered by the US Census Bureau. Race/Ethnicity groupings are then consolidated to match current Department systems, with Asian and Native Hawaiian/Pacific Islander groups combined into the Asian group, and two or more races, some other race alone and American Indian/Alaska Native combined into the Other grouping. The percentage demographic representation in various data and generated a per capita (per 1000 residents) count along with a table and graph for each activity. Data

¹⁰ <https://www.capolicylab.org/wp-content/uploads/2020/10/RIPA-in-the-LAPD-Summary-Report.pdf> pp12-13

Q4 Quantitative Analysis

Per Capita Population Benchmark

used for comparison to the population benchmark and per capita calculation was gathered during the fourth quarter of 2021 (January 1, 2022 – March 31, 2022). All available data was used for the historical per capita analysis, reaching back to either 2016 or the second half of 2018, depending on the dataset. All available prior year data was compared with overall trends per capita against types of SFPD activity, by demographic group. Finally, we conducted a disparity analysis by comparing per capita demographic data for certain groups against each other to determine if disparate treatment may be occurring.

Specific Methodology Notes

In addition to the general challenges of a population benchmark, noted above, the SFPD would like to highlight the additional methodological notes for clarity and context.

- Census¹¹/ACS data considers “Hispanic” as an ethnicity, while the suspect, stops, searches, uses of force, and arrest data considers “Hispanic” as a race.
- Suspects per District: Crime Data Warehouse was searched for persons categorized as “Suspects” on police incident reports. Suspect demographic information may be developed from calls for service or it may be developed at a subsequent point during investigation of an incident. All police incident reports (initial or supplemental) having a data value are included. Suspects with unknown race values are not included. While some suspects are subsequently arrested, and also listed as “booked” or “cited” on police incident reports, this category is not intended to include arrestees.
- Stops information provided reflects entries into the Stop Data Collection System (SDCS), a data collection tool provided by the California Department of Justice to assist departments in complying with AB953 and the RIPA Board’s data collection requirements.
- Searches information provided reflects entries into the SDCS, with the same caveats as above.
- Uses of Force information provided reflects entries into the Department UoF Database and account for a distinct count of uses of force broken down by District and race of subject force was used against.
- Arrests count persons “booked” and “cited” where an incident report (initial or supplemental) had a date value.

¹¹ SFPD discovered a calculation error in Q4, 2021 when tabulating census data. The error and corrected tables are included in the Q4, 2021 QADR.

Q4 Quantitative Analysis

Per Capita Population Benchmark

Quarter Per Capita Interactions

Using the previously mentioned methodologies, the following trends are noted.

Citywide suspect data shows in Q4 of 2022, 67 of every 1000 Black/African American residents of San Francisco may be reported as a suspect to a crime, as compared to 4 of every 1000 White residents.

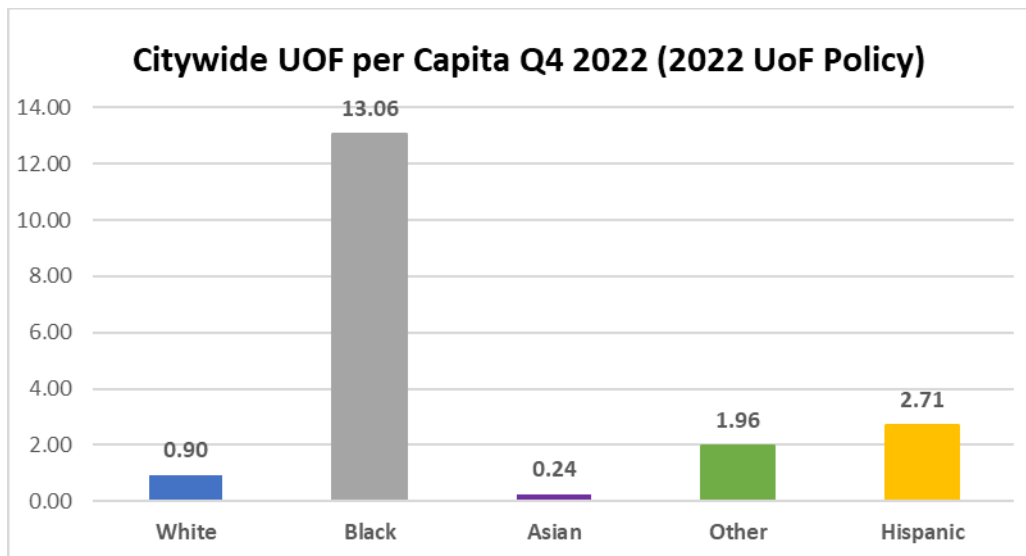

Citywide stops data shows in Q4 of 2022, 19 of every 1000 Black/African American residents of San Francisco may be stopped, as compared to 3 of every 1000 White residents.

Q4 Quantitative Analysis

Per Capita Population Benchmark

Citywide search data shows in Q4 of 2022, roughly 7 of every 1000 Black/African American residents of San Francisco may be searched as part of another interaction with the SFPD, as compared to less than 1 of every 1000 White residents.

Using the April 2022 UoF policy, citywide Use of Force data shows in Q4 of 2022, 13 of every 1000 Black/African American residents of San Francisco may be subject to a use of force, as compared to .90 of every 1000 White residents.

Q4 Quantitative Analysis

Per Capita Population Benchmark

Citywide arrest data shows in Q4 of 2022, roughly 25 of every 1000 Black/African American residents of San Francisco may be stopped, as compared to 2 of every 1000 White residents.

Q4 Quantitative Analysis

Per Capita Population Benchmark

Per Capita Interactions by Race

Analysis was conducted using the above methodology across all quarters from which we have useful data. In this case, starting in Q1, 2016 for Arrests, Uses of Force and Suspect data, and 2018 for Stops and Searches. We found the following trends. Note: Data labels and trend lines for the most impacted group(s) are included for context and clarity.

Citywide suspect data since 2016 shows that Black/African American individuals have been reported as suspects of crimes significantly higher than other demographic categories. On average, however, there has been a decline over time of the per capita inclusion of Black/African American residents within suspect reporting.

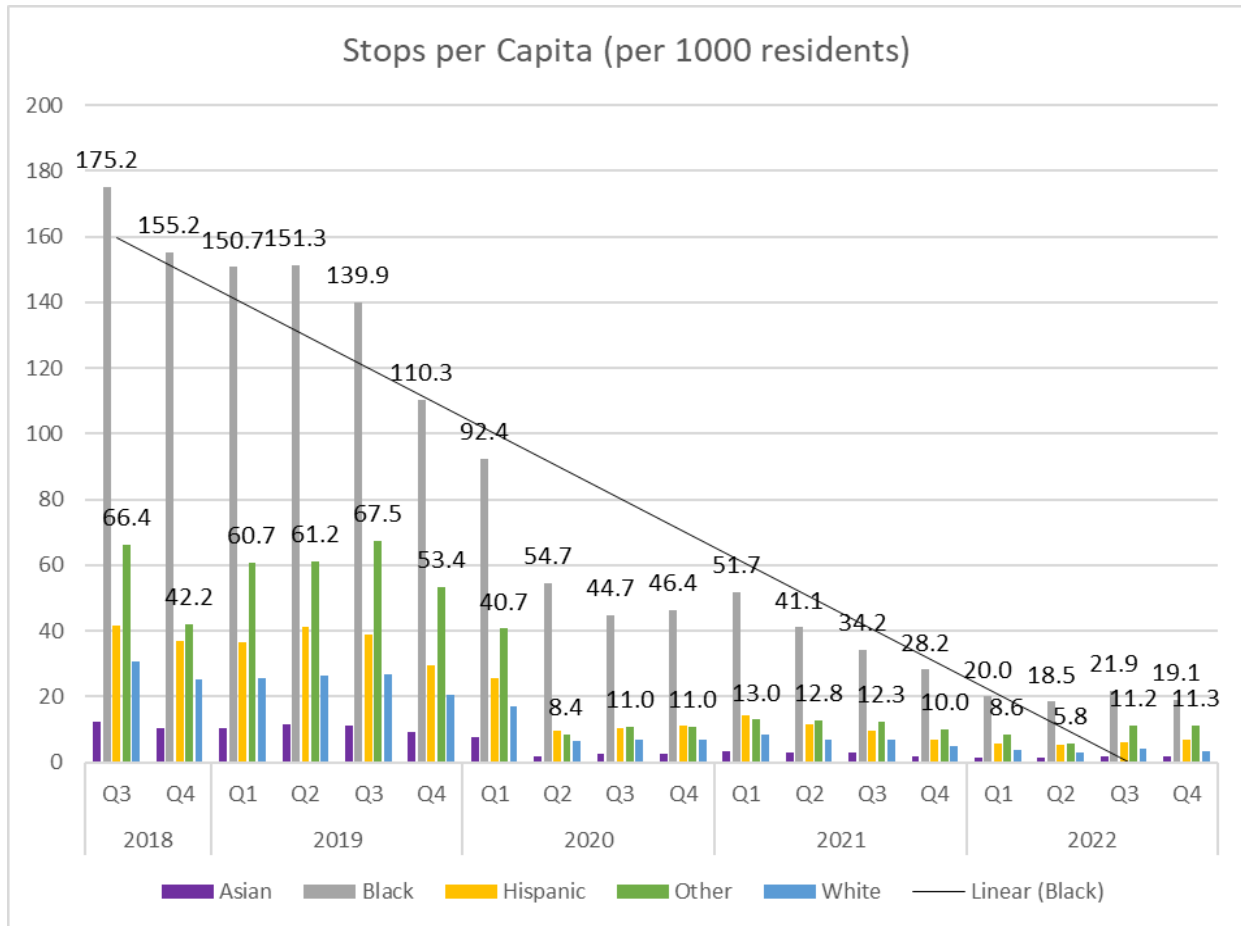

A linear trendline is produced for the most impacted group. Slopes for all trendlines are included in the above table to allow for comparison. Slope represents the

average change, per demographic group, per quarter. In this case the number of Black/African American individuals included in suspect data goes down 1.304, per 1000 Black/African Americans, per quarter, on average, over time.

Rate of Decrease, Suspects Per Capita	
Race	Slope
Black	-1.304
Asian	-0.023
Hispanic	-0.046
White	-0.026
Other	-0.864

Q4 Quantitative Analysis

Per Capita Population Benchmark

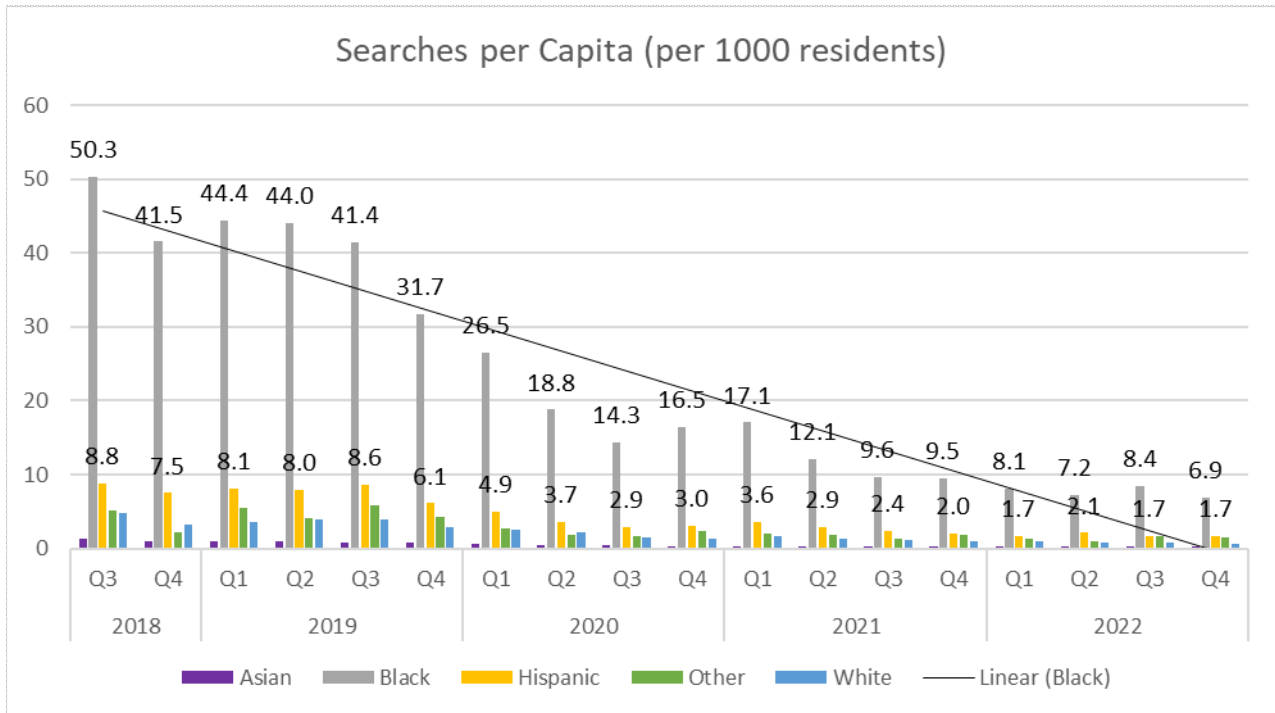

Citywide stops data since 2018 shows that Black/African American individuals have been stopped by the SFPD at significantly higher rates per capita than other demographic categories. There has been a significant decline over time, on average, of the per capita number of Black/African American stopped in a vehicle or pedestrian stop since mid-2018.

A linear trendline is produced for the most impacted group. Slopes for all trendlines shown in the above table to allow for comparison. Slope represents the average change, per demographic group, per quarter. In this case the number of Black/African American individuals included in tops data goes down 9.92, per 1000 Black/African Americans, per quarter, on average, over time.

Race	Slope
Black	-9.925
Asian	-0.700
Hispanic	-2.402
White	-1.725
Other	-3.739

Q4 Quantitative Analysis

Per Capita Population Benchmark

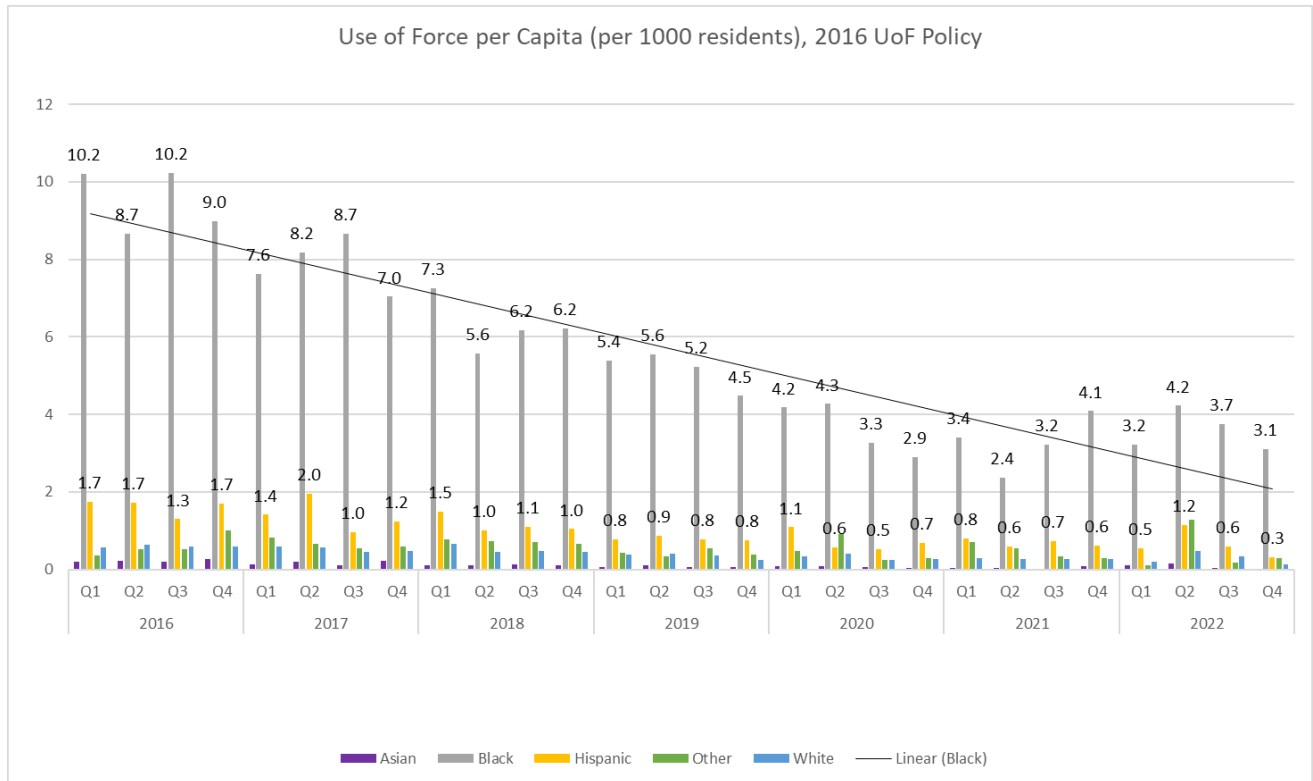

Citywide search data since 2018 shows that Black/African American individuals have been searched in connection with an interaction with the SFPD at rates higher than other demographic categories. There has been a significant decline over time, on average, of the per capita number of Black/African Americans searched since mid-2018.

A linear trendline is produced for the most impacted group. Slopes for all trendlines shown in the above table to allow for comparison. Slope represents the average change, per demographic group, per quarter. In this case the number of Black/African American individuals included in search data goes down 2.713, per 1000 Black/African Americans, per quarter, on average, over time.

Rate of Decrease , Searches Per Capita	
Race	Slope
Black	-2.713
Asian	-0.058
Hispanic	-0.464
White	-0.226
Other	-0.228

Q4 Quantitative Analysis

Per Capita Population Benchmark

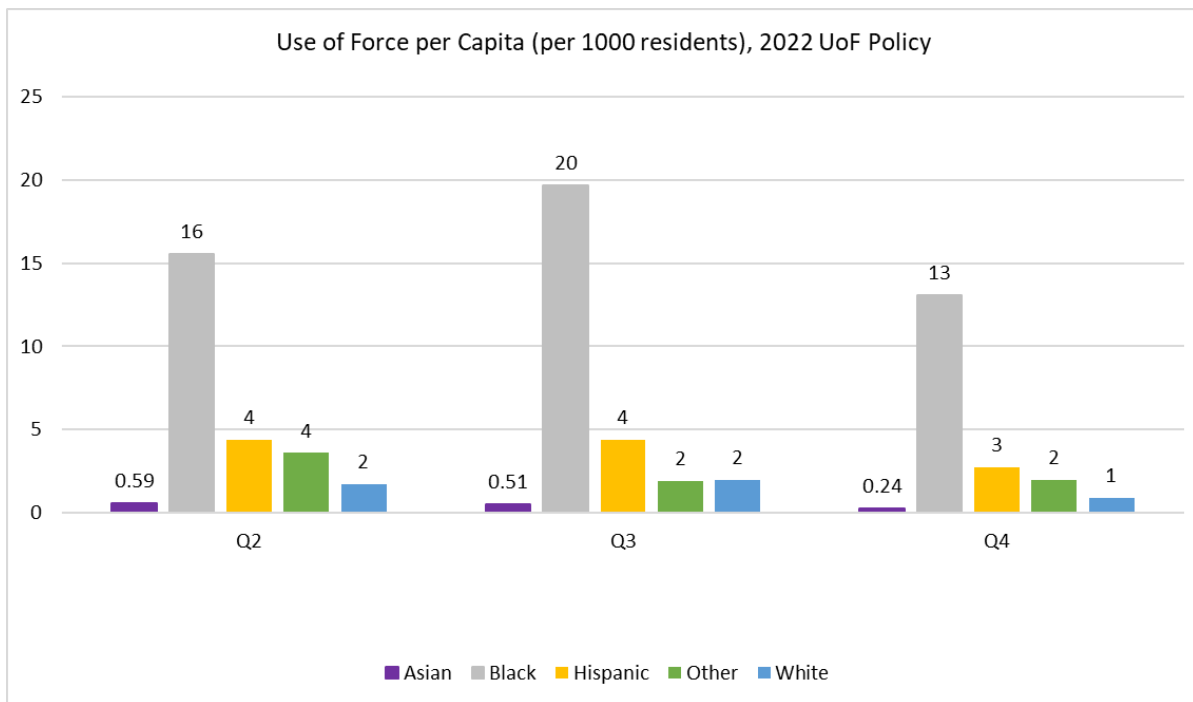

Citywide use of force data since 2016 shows that Black/African American individuals have been subject to a use of force at significantly higher rates as compared to other demographic categories. There has been a decline over time, on average, of the per capita number of Black/African Americans upon whom use of force has been used since 2016.

A linear trendline is produced for the most impacted group. Slopes for all trendlines shown in the above table to allow for comparison. Slope represents the average change, per demographic group, per quarter. In this case the number of Black/African American individuals included in UoF is at -.263, per 1000 Black/African Americans, per quarter, on average, over time.

Rate of Decrease, UoF Per Capita	
Race	Slope
Black	-0.263
Asian	-0.006
Hispanic	-0.043
White	-0.015
Other	-0.009

Due to the change in Use of Force policy, the 2016 policy data is used to provide context over time. A separate calculation for per capita use of force is included using only the April 2022 UoF policy below.

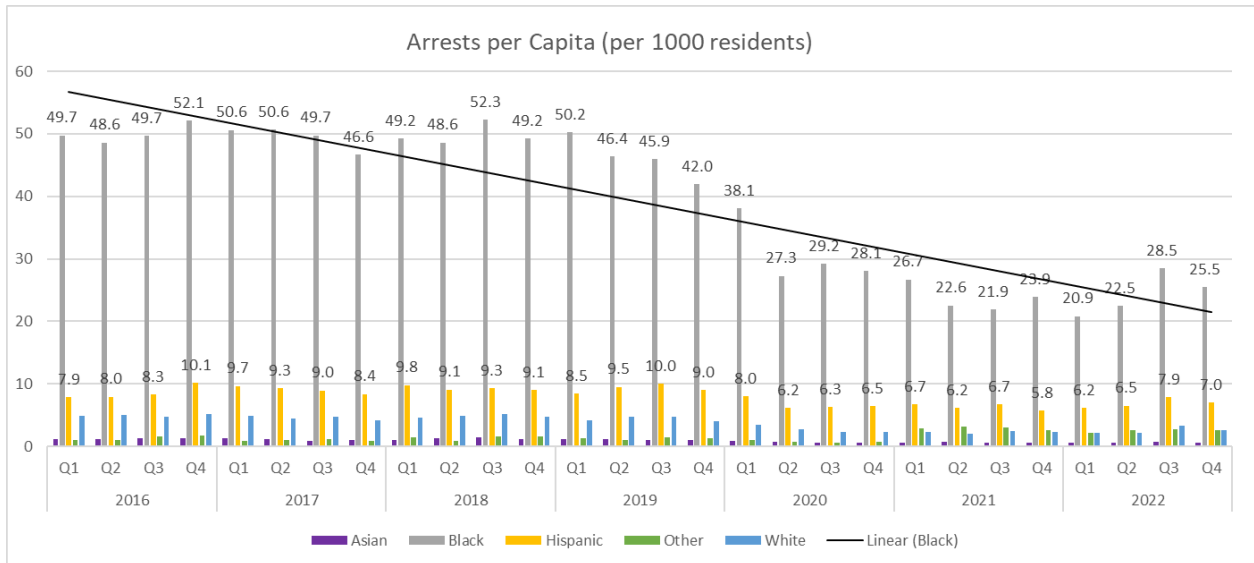

The data exploration section of this report delves into detail regarding the policy changes, and analytical methods used to derive the 2016 policy data

Data collected under the 2022 Use of Force policy shows that Black/African American individuals have been subject to a use of force at significantly higher rates as compared to other demographic categories. Comparisons over time, and rate of change are not available as this is the first quarter of reporting under the 2022 policy.

Q4 Quantitative Analysis

Per Capita Population Benchmark

Citywide arrest data since 2016 shows that Black/African American individuals have arrested at significantly higher rates as compared to other demographic categories. There has been a modest decline over time, on average, of the per capita number of Black/African Americans arrested since 2016.

A linear trendline is produced for the most impacted group. Slopes for all trendlines shown in the above table to allow for comparison Slope represents the average change, per demographic group, per quarter. In this case the number of Black/African American individuals included in Arrest data goes down 1.30, per 1000 Black/African Americans, per quarter, on average, over time.

Rate of Decrease , Arrests Per Capita	
Race	Slope
Black	-1.304
Asian	-0.029
Hispanic	-0.114
White	-0.123
Other	-0.061

Q4 Quantitative Analysis

Per Capita Population Benchmark

Yearly Per Capita Disparity Analysis

We further conduct a disparity analysis by baselining the 3 most represented demographics against each other to find a numerical representation of the disparity between groups, per SFPD interaction, per year. As with the other per capita analysis, Black/African American residents of San Francisco have higher rates of disparity in the data as compared to the White and Hispanic demographics groups.

Citywide suspect data shows that since 2016, Black/African American residents are between 14 to 19 times more likely to be listed as a suspect, than White residents.

Q4 Quantitative Analysis

Per Capita Population Benchmark

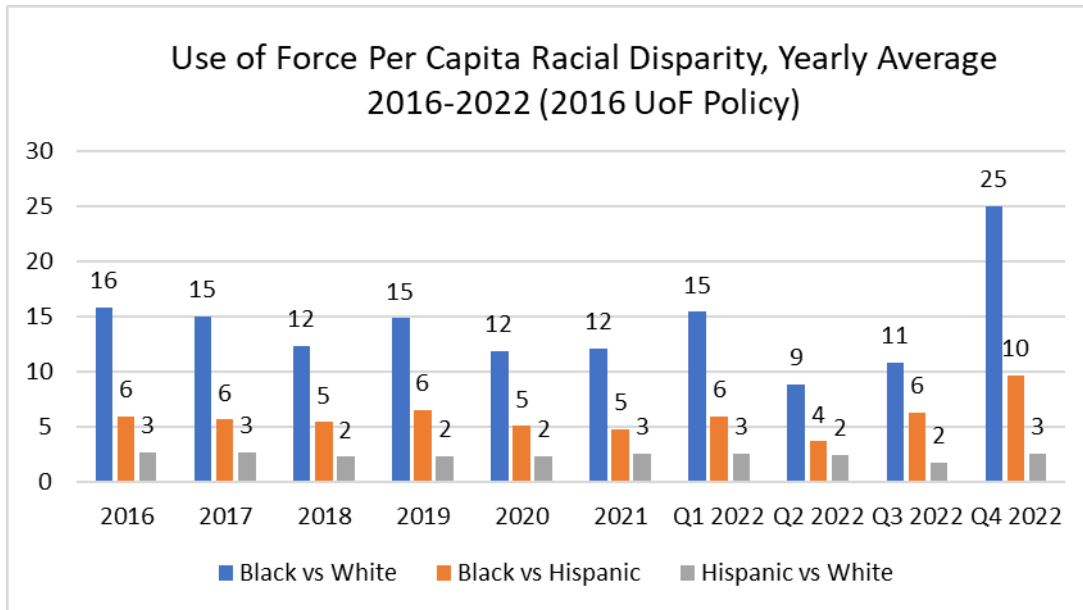

Citywide vehicle and pedestrian stop data shows that since mid-2018, Black/African American residents are 5 to 7 times more likely to be stopped than White residents.

Citywide search data shows that since mid-2018, Black/African American residents are between about 8 to 12 times more likely to be searched than White residents.

Q4 Quantitative Analysis

Per Capita Population Benchmark

Due to the change in Use of Force policy, the 2016 policy data is used to provide context over time. A separate calculation for per capita use of force is included using only the April 2022 UoF policy.

Under the 2022 Use of Force Policy, in Q4 2022, Black/African American residents are 9-14 times more likely to be stopped than white residents.

Of note, the Q4 2023 disparity change is likely due to a few factors. First, as noted earlier in this report, Q4 Use of Force data included in this report only captures October 1st, 2023 thru December 12th, 2023. Second, while uses of force against Black individuals declined between Q3 and Q4 under both the 2016 and April 2022 Use of Force standards, uses of force against White individuals declined significantly in both cases. Since the population remained steady and uses of force against subjects is much smaller, this drove down the rate of uses of force against white individuals per white resident. This rate represents the denominator when determining how much more likely force would be used against African American individuals, as compared to white individuals. The numerator, which represents uses of force against African American individuals per African American resident, which also declined, but to a lesser degree, these changes would further amplify the likelihood (the ratio) of force being used against African American individuals, as compared to white individuals.

Total Uses of Force by Race/Ethnicity, 2016 UoF Standard						
Race/ Ethnicity	Q3 2021	Q4 2021	Q1 2022	Q2 2022	Q3 2022	Q4 2022
Asian	5	23	36	46	13	4
Black	141	179	141	185	164	136
Hispanic	97	83	72	154	79	43
Other	14	12	5	54	8	12
White	95	93	74	170	123	44

Between Q3 2022 and Q4 2022, Uses of Force against White individuals declined from 123 to 44, while Uses of Force against Black individuals declined from 164 to 136.

Total Uses of Force by Race/Ethnicity, April 2022 UoF Standard			
Race/ Ethnicity	Q2 2022	Q3 2022	Q4 2022
Asian	178	153	72
Black	681	861	572
Hispanic	585	584	361
Other	152	81	83
White	608	693	320

Between Q3 2022 and Q4 2022, Uses of Force against White individuals declined from 693 to 320, while Uses of Force against Black individuals declined from 861 to 572.

Q4 Quantitative Analysis

Per Capita Population Benchmark

Citywide arrest data shows that since 2016, Black/African American residents are between 10 to 11 times more likely to be arrested than White residents.

What did we find?

We found that Black/African American individuals are represented at a higher rate among those subject to SFPD interactions than is represented in the residential population. The Black/African American population has the largest differential, especially when compared against the White population. These findings provide context around who is involved with the SFPD at various points of engagement but does not answer the question of ‘why’ this is the case.

It is possible that some or all factors discussed in the benchmark description section above are affecting the data in some way.

The context provided gives us a common frame for conversation, mutual understanding, and a starting point from which additional analysis may occur.

What's next?

The Department looks forward to continuing analysis of data on a quarterly basis. However, it should be noted that SFPD will need to build out analytical capacity in order

to carry out some of this work, and timeline expectations will be shared and updated with the publishing of each quarterly report.

The SFPD has also partnered with multiple academic entities to assist in academic level analyses of SFPD data, including:

- The California Policy Lab at UC Berkeley and UC Los Angeles,
- Stanford's SPARQ center,
- Palo Alto University, and
- The Center for Policing Equity
- New York University

Domestic Violence Reporting

- Admin Code Sec. 96D.2b

Domestic Violence Reporting - Background

In November 2021, the Board of Supervisors approved, and Mayor Breed signed, legislation amending the San Francisco Administrative Code to require certain data involving Domestic Violence be reported on a quarterly basis starting in the first quarter of 2022. The report is to be submitted on a quarterly basis to the Board of Supervisors, the Mayor, Office of Racial Equity, the Human Rights Commission, the Department on the Status of Women, and the Police Commission.

Domestic Violence Calls for Service and Investigations

Domestic Violence, also known as Intimate Partner Violence, is abbreviated as DV for brevity in this report. For the purposes of this report, Admin Code 96D defines Domestic Violence as: *"Domestic Violence" means the crime defined in Section 273.5 and the crimes punishable under Section 243 (e){1}, of the California Penal Code.*

The SFPD responds to calls for service (CFS) received by the Department of Emergency Management (DEM) whether as a 911 emergency or through the non-emergency line. After gathering information from the caller, DEM staff has the responsibility of determining the appropriate code for the call, based on the information provided, and to dispatch units to the location as either a Priority A (highest), Priority B, or Priority C.

Upon arrival, SFPD officers conduct a thorough investigation into the allegations of domestic violence. Per SFPD policy, calls for service are coded with a final disposition of domestic violence (DV) in cases in which DV is evident during an officer's investigation.

In some cases, a report may be taken without a call to 911 (self-reporting at a police station, for example.) In these cases, a call for service number is generated during the report writing process.

This is a quarterly data report, covering 1 October 2022 through 31 December 2022.

Admin Code Sec. 96D.2b Reporting Components

1(A) The number of calls for service for domestic violence that the Police Department received from the Department of Emergency Management for the period of October 1 to December 31, 2022.

Calls for Service, Final Call Code Includes "DV" October 1 - December 31, 2022				
	2022			
	Oct	Nov	Dec	Total
DV Calls for Service	505	394	449	1348

1(B) The number of domestic violence cases that the Police Department presented to the District Attorney for investigation and/or prosecution in the prior quarter, and of those cases, the number in which a child or children were present and/or a firearm or firearms were present.

DV INCIDENTS SUBMITTED TO THE DISTRICT ATTORNEY'S OFFICE			
	2022		
	Oct	Nov	Dec
Number of DV Cases Presented to the District Attorney's Office	74	39	64
Number of DV cases referred to the DA in which a child was present	7	3	9
Number of DV cases referred to the DA in which a firearm was present	0	3	1

Confiscation of Weapons: Pursuant to Penal Code § 18250 and Department policy, officers are mandated to confiscate any firearms or other deadly weapons discovered at the scene of a domestic violence incident. The weapon is booked into the Department's Property Room as evidence. As federal and state laws prohibit individuals convicted of a domestic violence charge from owning or acquiring a weapon, the Property Room follows DOJ protocols, including a criminal records' checks, to determine if the individual is eligible for release of the weapon.

Presence of Children: SFPD Department General Order 6.09 also outlines the procedures to follow if children are present during a domestic violence incident. DGO 7.04, Children of Arrested Parents, provides guidance to minimize the negative impact and harmful stressors on children when a parent/guardian is arrested whether in their presence or not. This policy is considered a national model, highlighting law enforcement's responsibility to ensure a safe environment for children following a traumatic experience such as the arrest of one's parent.

SFPD Quarterly Activity & Data Report

Stop Data Quarter 4 2022

In Q4-2022, there were a total of 3,999 stops, a 18% decrease from Q4-2021. Of those stops, 915 (22.8%) resulted in searches.

Total Stops Oct 1 - Dec 31, 2022				
Type of Stops	Oct	Nov	Dec	Total
Dispatched	405	353	384	1,142
Self-Initiated	776	1,083	998	2,857
Total Stops	1,181	1,436	1,382	3,999

Total Searches Oct 1 - Dec 31, 2022				
Type of Stops	Oct	Nov	Dec	Total
Dispatched	203	160	170	533
Self-Initiated	112	116	154	382
Total Searches	315	276	324	915

The Department utilizes the SDCS program definitions under AB953; a 'stop' is defined as 1) any detention, as defined in regulations, by a peace officer of a person or 2) any peace officer interaction with a person in which the officer conducts a search as defined in regulation.¹² Stops include Traffic Stops and Pedestrian Detentions. Stops may be Self-Initiated or Dispatched.

*Six stops during Q4 resulted in contact with the Department of Homeland Security or its subordinate organizations. One of the stop data entries was made in error. CA DOJ was notified of the error and the entry is in the process of being removed from SFPD records.

The other five incidents have occurred at the San Francisco International Airport where Department of Homeland Security/TSA was notified and responded as follows:

- *On 11/4/22 (case #22-30852), a subject went through a checkpoint with a stun-gun in their carry-on luggage. The person was stopped and detained. The DHS/TSA was notified of the incident and responded as is the policy in the event they wanted to impose civil fines.*
- *On 11/6/22 (case #22-31056, a subject was detained for going through a secured door after he got lost coming off of a flight. The DHS/TSA was notified as is the policy.*
- *On 11/25/22 (case # 22-32958), a subject went through a checkpoint with a stun-gun in their carry-on luggage. The person was stopped and detained. The DHS/TSA was notified of the incident and responded as is the policy in the event they wanted to impose civil fines.*
- *On 12/13/22 (case #22-34752), a subject went through a checkpoint with a stun-gun in their carry-on luggage. The person was stopped and detained. The DHS/TSA was notified of the incident and responded as is the policy in the event they wanted to impose civil fines.*
- *On 12/13/22 (case #22-34753), a subject went through a checkpoint with a stun-gun in their carry-on luggage. The person was stopped and detained. The DHS/TSA was notified of the incident and responded as is the policy in the event they wanted to impose civil fines.*

There was no violation of DGO 5.15, Enforcement of Immigration Laws.

Calls for Service, Q4 2022

Calls for Service

The Department responded to 102,093 total calls for service during October 1 through December 7, 2022. Call volume slightly decreased from the month of October to the month of November during the Q4-2022. However, December accounted for 8,622 calls for service since data excludes December 8-31, 2022, for the purpose of accounting for Use of Force Apr 12-December 7, 2022, standard data comparison.

Data Source: San Francisco Police Department CAD

Suspects, Q4 2022

SUSPECTS OBSERVED AND/OR REPORTED TO SAN FRANCISCO POLICE DEPARTMENT

Suspect information/description is either provided by a member of the public, reported directly to the police or through dispatch, or is observed by a department member during a self-initiated call for service in which there is reasonable suspicion or probable cause for an officer to conduct a stop. The suspect information is documented in a police incident report that is generated from the call for service.

The following table summarizing suspect descriptions gathered from incident reports through the means stated above. Data captured shows that approximately 39% of the individuals reported are Black/African American.

SUSPECTS by Race/Ethnicity October 1, 2022 - December 31, 2022					
DESCRIPTION	Oct	Nov	Dec	Q4 2022	% of Total Suspects Q4 2022
Asian/ Pacific Islander	98	81	103	282	3.7%
Black/ African American	1103	965	895	2963	38.4%
Hispanic/ Latino	479	407	368	1254	16.3%
Native American	5	10	3	18	0.2%
White	545	458	525	1528	19.8%
Others	548	557	561	1666	21.6%
Total	2,778	2,478	2,455	7,711	100.00%

Note: Suspect data is extracted from incident reports via the Person Schema of Crime Data Warehouse via Business Intelligence tools. Search criteria includes results in which Person Type = "Suspect." Records with Unknown Race/Ethnicity data are not included.

Use of Force, Q4 2022

Total Use of Force Overview

January 1, 2016, through December 7, 2022

There were 952 Uses of Force in Q1-2016 compared to 1,408 in Q4-2022 under the April 12-December 7, 2022, policy and 239 Uses of Force under the 2016 Use of Force policy.

Changes to the Use of Force Department General Order and associated data collection is discussed in the data exploration section of this report and should be kept in mind when interpreting these data.

Where possible this report provides data under both the 2016 and April 2022 Use of Force policy to allow for historical context and tracking of trends over time.

Use of Force, Q4 2022

Total Use of Force Overview by Subject Race/Ethnicity

During Q4-2022, October 1 through December 7, 2022, 18% of the total Uses of Force were against White individuals, 57% were against Black/African American individuals and 18% were against Hispanic/Latino individuals.

Department of Police Accountability (DPA)

The Department is required to obtain information from the Department of Police Accountability (DPA), formerly the Office of Citizens Complaints, relating to the total number of complaints for the reporting period received by DPA that it characterizes as allegations of bias based on race or ethnicity, gender, or gender identity. The Department also is required to include in its report the total number of complaints DPA closed during the reporting period that were characterized as allegations of bias based on race or ethnicity, gender, or gender identity, as well as the total number of each type of disposition for such complaints.

Allegations of Bias based on Race or Ethnicity, Gender, or Gender Identity

Cases Received in Q4-2022

Type of Case Received	# of Cases
Racial Bias	2
Gender Bias	0
Transphobic Bias	0
Both Racial and Gender Bias	0
TOTAL	0

DPA received 175 total cases for the quarter.

2 officers were named for allegations of racial or gender bias.

Total Cases Received in 2022 involving Racial or Gender Bias: 8

During Q4-2022, DPA completed 7 complaint investigations in cases in which there was an allegation of racial/ethnic or gender/gender identity bias.

There were no sustained allegations of racial or gender bias in 2022.
