DOJ Recommendation #: 22.1

The SFPD needs to improve data collection on use of force so that further analysis can be conducted to better understand this finding.

DOJ Objective: Use of Force

Executive Summary:

The new Supervisory Use of Force Evaluation Form includes the tracking of multiple factors and demographics that had not been tracked prior. The form collects the demographics of the officer and the subject as well as the type of force used along with the resulting injury if any. Additional fields collected include subject's mental state, reason force was used and if the subject was armed and what they were armed with.

This form has been created side by side with the data tracking system we currently use (AIM) to capture all these fields in order to generate reports which reflect all the various fields. As the need for further fields is identified, they can easily be added to the form as well as AIM in order to further customize and analyze the use of force data

Purpose:

To improve data collection on each reportable use of force incident which will allow SFPD to better understand and analyze use of force trends.

Policy:

Department Bulletin 17-006 mandates that supervisors must complete a Supervisory Use of Force Evaluation Form for each reportable use of force and submit through the chain of command before the end of their watch. The Supervisory Use of Force Evaluation has been rolled out department wide as of 1/9/17.
