Active Aggression	Not defined	Degree of force that is objectively reasonable, necessary under the circumstances, and proportional to the threat or resistance of a subject.	Attempting to or attacking officer or other (e.g. lunging fighting stance, punching).			Objectively reasonable standard based on the totality of the circumstances outlined in Graham vs. Connor. Objectives where force may be used: Lawful arrest or detention, gain control of a combative, prevent and /or terminate the commission of a crime, intervene in a suicide, defense of self or others.	<u>Aggressive Resistance:</u> Intent to harm the officer, themselves or another person. Prevent officer from controlling or taking into custody: fighting stance, punching, kicking, striking, attacks with weapons or other actions which present an imminent threat of physical harm to officer or another.	Behavior initiated by a subject that may or may not be in response to police efforts to bring the person into custody or control. Active aggression is presenting behaviors that reasonably indicate an assault or injury to any person is likely to occur.		Allowed to use objectively reasonable force based on a totality of circumstances as analyzed under the 4th Amendment to affect a lawful police purpose to control dangerous and violent subjects. Note: OPD's General Order (K3) Use of Force does not contain definitions nor prohibitions for using ECWs.	A threat or overt act of assault (through physical or verbal means) coupled with present ability to carry out the threat or assault that reasonably indicates that an assault or injury to any person is imminent.		
Aggravated Aggression	Not defined		Subject's actions create perception that the officer or another person is subject to imminent death or SBI.	Not defined	Not defined		<u>Aggravated Aggressive Resistance:</u> Subject's actions are likely to result in death or SBI to officer, themselves or another. May include a firearm, blunt or bladed weapon, and extreme physical force.	Not defined	Not defined			Not defined	Not defined
